#### 主课教学报告

主课老师: 王晓菲、孙士迪

#### 一. 班级状况与孩子状态

这个四年级的学生人数,与上一学期一样,29人,女生15人,男生14人,男女生相当。女同学在意识状态上较男同学显得更清醒自觉,男同学差异性较大,几个大一点的男孩稳重清晰,其余的孩子心智偏小。通常班级容量大不易组织教学,这个班四年来在主班老师的权威下,孩子们得以有稳定有序的学习节奏,孩子们的跟随性非常好,各科老师们都可以顺利有序地进行教学活动。

在斯坦纳的讲述中,大约四五年级这一年龄段称为童年的心脏。介于青春期和少儿的中段,整体来说较为平衡。4月中旬,主班老师孙士迪因家庭原因不能持续工作,我暂代主班老师工作,孩子们在校的学习秩序可以继续保持,但环境的变化还是带给孩子们很多不稳定。师生之间的新关系,促使他们不得不清醒面对。

十岁的孩子们有强大的能量,他们渴望对这个世界有更多了解,渴望从各个角度去发现,如从自然科学,动物与人类的关系,从形变的角度去研究,对本地环境的历史与地理的角度去看。他们可以有一些新的挑战,可以有更多独立机会工作。对于个体与集体,比以往有了新的需求,既要保持集体的紧密关系,同时个体的发展是来自内在的持续需要。

#### 二、教学内容

4月中旬接替工作以来的教学内容如下 人与动物 1周半 中国上古神话 3周 北京地理 3周 (士迪带, 我主带游学) 另有语文,后改为戏剧(北欧神话); 塑形; 水彩等。

#### 三、课堂记录及班级观察

《人与动物》的一周半时间里,压缩时间完成了三个内容的学习,孩子们自主完成了一个小项目,关于鹰。老师的带领学习已有近四年,孩子们很熟悉了,他们需要机会挑战自我,或者可以看作是一次自我学习的检验,我选择了项目学习,经由小组合作,通过查寻资料、创编歌曲、写诗词、绘画等艺术手段的综合运用,孩子们尝试独立学习,展示的时间只有一节课,前期的准备的确花了不少功夫。以后多一些自主学习的机会,对孩子们来说,是必要的。

NAM

《中国上古神话》是接续上学期的英雄史诗,从五帝到大禹,这一过程中,是班级师生的一次共同想象,在庞杂巨大的神话体系里,孩子们可以感受到中国古人思想的由来与传承,自上古时期,至眼下,一以贯之。对于他们的意识发展,如何——对应,孩子们在故事中,可以自己体验到,这份体验中的细节因人而异,未来下学期将进入到中国历史的学习中,将会进一点深入,通过了解外在而达到内在觉醒。期间加入了一些古汉语的体验,孩子们完全沉浸其中,喜悦与享受在每个孩子的脸上和心里,学习的愉悦是可见的,可感的。所以,学习是快乐的,学海无涯不见得是苦作舟,就看是什么样的学习。

《本地地理》是一门综合学科,放在学期末是较为合理的。本学期的地理是围绕北京城的历史与地理而展开,并且需要通过脚踏实地的感受,方能建立我与世界的链接,所以游学很重要。但由于天气炎热,原本5天的计划,压缩为3天。我们需要面对这种意外,有安然的态度。孩子们直呼不过瘾。游学主要走了两条线,一是作为北京城水源的人力建设下,建立在白浮瓮山河基础上的京密引水渠,是作为这条引水渠边上的我们,必然要经历的。下游作为北运河的北端,是京津非常重要的一段。二是北京城的建设与发展中最为重要的中轴线理念,也是中国文化中最重要的思想体现之一,北京中轴线从永定门出发至钟鼓楼,遗憾的是,我们只到达了景山西门。希望有时间可以补得上。其中关键的一点是两线交汇处的万宁桥。

#### 四、总结与反思

能与这个班的孩子一起工作是幸福的,孩子们是天然纯净的,感恩相遇。 能与这个班的家长有接触也是幸运的,家长们已是较为成熟的社区家庭成员了。 能与这个班的老师们一起工作是愉悦的,老师们的尽心尽力随时随处可见。

先说写作,在每个主题中,都贯穿着语文的学习与运用,四年级的写作是每堂主课不可分割的一部分。看到的

定 与于孩子的中与郁特丽子前返的近步。对与也孩子未说,与什不再走了杂珠起,一是页的与作成了家常便取。有的孩子可以写得流畅自由,但总是有些孩子需要一些鼓励。如果能有时间,可以增加一些语文的练习会更好。

再说戏剧,这是本学期末我接手以来的一项重要工作。它需要老师的全心全力,需要与孩子内在的心魂深入工作。不然,只是一场戏而已。整体的呈现,还算不错,过程中有待反思与总结。学校中的戏剧课,它的目标究竟是什么,如何与孩子的意识发展结合,支持孩子的成长呢。戏剧可以全方位照见,照见老师,照见孩子,如此重要的课堂,我们如何珍惜与利用。

最后,是老师本身,我们带着怎样的心与孩子工作。

课程描述	对于四年级的手工课,一个很重要的内容是学习十字绣,学生们要自行设计和绣制图形和颜色都对称的图案,为织物做装饰或者进一步缝制成实用的物品。绣十字绣类似于跳音语舞时做出双臂交叉的"A"的姿势。它呼应了孩子们从三年级刚刚降落到大地上,到四年级自我意识的萌芽的过程,可以帮助孩子们变得更加精确,可以唤醒他们的内在,让孩子们从内在体会到中心感,"我"的意识更加清晰。帮助他们刚开始要独立的阶段找到自信心、个性的力量和内在的坚定。 基本的图案设计是孩子们学习的一部分,设计图案时需要注重对称性,左右对称、上下对称,以及中心对称。一方面籍由身体的对称性,孩子们体验到对称是一种重要的内在练习,另一方面对称本身实际上对应的是空间关系,而不是线条,因此孩子们要始终带着空间意识去工作。在颜色的选择上,学生们要掌握如何运用颜色提升图形的效果,以及如何用色彩彰显作品的功能性。在工艺上,需要保持十字交叉的一致性。 具体教学内容包括: 1) 缝制作为练习的小绣片,并装饰在剑套上。 2) 设计并缝制20厘米见方的大绣片,加里布和拉链后,制作成笔袋。

## **Student Learning Report for**

#### Semester 23T1 (First Semester of 2023)

Student Name: Wen Deyuan

Student ID: 3110292209

#### **Main Class Subject Report**

Main Teachers: Wang Xiaofei, Sun Shidi

#### 1. Class Overview and Student Condition

The number of students in this fourth-grade class remains the same as the previous semester, with 29 students—15 girls and 14 boys. The ratio of boys to girls is balanced. In terms of awareness, the girls appear more alert and self-aware, while there is more variability among the boys. Some of the older boys are steady and clear-minded, while the rest exhibit less mental maturity. Typically, larger class sizes can make organizing math lessons difficult. However, under the authority of the homeroom teacher, this class has maintained a stable and orderly learning rhythm over the past four years, with students following instructions well. All subject teachers can carry out teaching activities effectively.

According to Steiner's philosophy, children in the fourth and fifth grades are considered to be in the "heart of childhood," a period between early childhood and adolescence. This phase is generally balanced. In mid-April, due to family reasons, Mr. Sun Shidi, the main teacher, could no longer continue teaching, so I temporarily took over. Although the learning environment remained stable, the change still brought some uncertainty for the students. The new teacher-student relationship forced them to face this shift with clarity.

Ten-year-olds are full of powerful energy. They are eager to learn more about the world and to explore from different perspectives, such as natural science, the relationship between animals and humans, and historical and geographical contexts. They face new challenges and have opportunities for both individual and collective growth, needing to balance close group ties with personal development.

\_\_\_\_\_

#### 2. Teaching Content

Since taking over in mid-April, the following topics were covered:

- Humans and Animals: 1 week
- Ancient Chinese Mythology: 3 weeks
- Beijing Geography: 3 weeks (including a field trip led by me)
- Additional subjects: Chinese language, later switched to drama (Norse mythology), sculpture, watercolor painting, etc.

\_\_\_\_\_\_

#### 3. Classroom Notes and Observations

- During the one-and-a-half weeks dedicated to "Humans and Animals," we completed three topics, and the students independently worked on a small project about eagles. After nearly four years of guided learning, the students are familiar with the process. They need opportunities to challenge themselves and experience self-directed learning. I chose a project-based approach, where students worked in groups to gather information, write lyrics, compose songs, and create artwork. Although the final presentation only took one class period, the preparation required significant effort. In the future, more opportunities for independent learning will be essential for the students.
- In "Ancient Chinese Mythology," we built upon the heroic stories from the previous semester, continuing with the Five Emperors and the story of the Great Flood. This journey was a shared imaginative experience for both students and teachers, allowing the students to understand the origins and inheritance of ancient Chinese thought. From ancient times to the present, this continuity has shaped their development of consciousness. The students had their own unique experiences during the stories, and in the next semester, we will delve deeper into Chinese history, further awakening their inner awareness through external understanding. We also included a brief introduction to classical Chinese, where students were fully immersed and joyful, visibly enjoying the learning process. This shows that learning can be a joyful experience.
- "Local Geography" is a comprehensive subject that was introduced at the end of the semester, which is appropriate. The geography lessons focused on the history and geography of Beijing, and real-world experiences were necessary to establish a connection between the students and the world. The field trip was crucial but shortened from five days to three due to hot weather. We needed to adapt to this change with a calm attitude, though the students felt they hadn't had enough time. The trip covered two main lines of exploration: (1) the Beijing-Miyun Water Diversion Canal, a key construction project in the history of Beijing, built on natural rivers and mountains, and (2) Beijing's central axis, a symbol of Chinese culture, stretching from Yongdingmen to the Drum Tower. Unfortunately, we only reached

the westernmost gate, and I hope to continue this exploration in the future. A key point was the Wanning Bridge, where the two lines intersect.

#### 4. Reflection and Summary

- Working with this class of students has been a blessing. They are naturally pure, and I am grateful for the opportunity to meet them. I am also fortunate to interact with the parents, who are now mature members of the school community. Working alongside the other teachers has been a pleasure, as their dedication is evident at all times.
- Regarding writing, language learning and application have been integrated into
  every lesson. Writing is an inseparable part of the fourth-grade curriculum. While
  many students write smoothly and freely, some still need encouragement. More
  time spent practicing structured writing would be beneficial.
- Concerning drama, this was an important project I took over at the end of the semester. Drama requires full commitment from the teacher and deep inner work with the students. Otherwise, it would simply be a performance. The overall presentation was decent, but there is room for reflection and improvement. The role of drama in the curriculum and how it supports the students' development is something that needs further exploration. Drama can provide insight into both the teacher and the students. Such an important class deserves more attention and careful use.
- Lastly, as teachers, we must always reflect on our own attitudes and approaches to working with children.

- Beijing Geography and History

End of Report.

#### **Course Study Report**

Course Code: W0141 | Course Name: sculpture | Instructor: Wang Xiaofei | Total Class Hours: 103

The included courses are sculpture, Chinese language, watercolor painting, drama, and Chinese mythology.

#### **Course Description:**

- The main course was Ancient Chinese Mythology, with the drama serving as an
  extension of the course, focusing on the practice of Norse mythology in theater.
  Sculpture and watercolor painting were integrated as artistic approaches to support
  the main course, while language lessons were long-term and connected to both the
  main course and drama. These aspects are presented in the main course teaching
  summary.
- Additionally, there was a local geography component with a field trip focused on the geography of Beijing.

#### **Student's Individual Performance:**

• This student is gentle and has clear expectations for themselves, taking their studies seriously. However, they sometimes need reminders from the teacher, as they can be influenced by the performance of others, causing them to forget their own tasks. In their interactions with classmates, the student is generous and forgiving, but also needs timely reminders to stay focused on their own work. They are easily influenced by others but enjoy socializing and maintain good relationships with their peers.

Course Code: Y0163 | Course Name: Handicrafts | Instructor: Ma Lei | Total Class Hours: 40

#### **Course Description:**

• For fourth-grade handicrafts, an important component is learning cross-stitching. Students design and stitch symmetrical patterns in both shape and color, which can be used to decorate fabrics or turned into practical items. Cross-stitching resembles the "A" posture with crossed arms in jump rope, reflecting the children's journey from grounding in third grade to the emergence of self-awareness in fourth grade. This practice helps children become more precise, awakening their inner selves and enhancing their clarity of self-awareness. It builds confidence, individuality, and inner strength as they begin to embrace independence.

- Basic pattern design is part of the learning process, focusing on symmetry—left and right, top and bottom, and central symmetry. Symmetry serves as both an important internal exercise and a spatial awareness practice. Color choice plays a role in enhancing the design's impact, while maintaining the consistency of the cross-stitch is essential.
- Specific teaching content includes:
  - 1. Sewing small decorative pieces to attach to a sword sheath.
  - 2. Designing and sewing a 20 cm square piece, which is turned into a pencil case after attaching fabric and a zipper.

#### **Student's Individual Performance:**

• Deyuan shows enthusiasm and initiative in handicrafts. He has high standards for himself, follows instructions well in class, and is always attentive and focused on his work. He is willing to spend time outside of class working on handicrafts. His use of color is delicate, and his designs are creative. He is capable of working independently but also enjoys collaborating with classmates, demonstrating good social integration. His physical strength, especially in his fingers, is somewhat weak, requiring further practice. It is hoped that he will become more relaxed and confident in exploring new creative ideas.

Course Code: T0087 | Course Name: Percussion Music | Instructor: Tian Bo | Total Class Hours: 20

#### **Course Description:**

In the context of anthroposophic-inspired education, focusing on individual self-awareness, this course integrates the spirit of traditional Chinese music's goals (harmony with oneself, others, and the environment). It uses the Six-Tune Seated Music Suite from Xi'an Drum Music as the core content, offering diverse perspectives (music, astronomy, human culture, and geography) to foster cultural confidence and the unique thinking patterns of Chinese culture in teenagers.

#### Student's Individual Performance:

This semester, there has been noticeable change in the student, showing less agility
and liveliness and more downward energy (often lying on the desk in a daze).
 Participation in class activities has decreased, and this is being monitored. There are
no notable issues in social interactions with peers.

Course Code: L0120 | Course Name: English | Instructor: Feng Jinhui | Total Class Hours: 50

#### **Course Description:**

- The course continues to include verbal exercises, poetry, songs, and question-and-answer games. This year, text writing was introduced, which the students were looking forward to, and became the central theme. The course focuses on writing, spelling, and reading. Writing builds upon content learned in the previous three years, with students recognizing familiar vocabulary through repeated oral practice and then writing them down in word family lists (e.g., body parts, classroom items, seasons).
- The goal is for students to write poems, songs, and rhymes they've previously learned and expand their vocabulary through reading. Simple games like "Hangman" were used for reinforcement. Toward the end of the semester, five minutes of independent reading time was introduced, using Oxford Level books, as preparation for increased reading in fifth grade.

#### Student's Individual Performance:

• The student follows class activities well, works diligently, but takes a while to get fully engaged. They are very particular about adhering to rules.

\_\_\_\_\_

Course Code: L0121 | Course Name: Japanese | Instructor: Zhao Yuehan | Total Class Hours: 50

#### **Course Description:**

 After learning all the Japanese hiragana, fourth graders move on to learning time, dates, days of the week, colors, animals, and fruit vocabulary. This also involves organizing previously learned words and reviewing past songs and rhymes, along with practicing many tongue twisters.

#### Student's Individual Performance:

There has been a noticeable change, with a more playful side emerging. When
focused, the student's quality of work is very high, but when distracted, they can
easily be brought back on task. The student is now well-integrated with the rest of
the class.

\_\_\_\_\_

Course Code: T0089 | Course Name: Physical Education | Instructor: Wang Liwei | Total Class Hours: 40

#### **Course Description:**

- Fourth-grade physical education focuses on games that shift attention from "us" to "me," emphasizing polar experiences such as dreaming and waking, weakness and strength, safety and danger, or creation and destruction. This rhythm emphasizes the breathing element of contraction and expansion. In group competition games, the principle of separation becomes stronger, and the games become more intense. Students must awaken from the teacher's implanted imagery, and those still dreaming are caught.
- At this age, children may start challenging adult authority or feel detached from the group. Learning and respecting rules become increasingly important socially and morally. As children become more aware of their personal space, both physically and internally, the course responds by cultivating an awareness of spatial dimensions (up and down, left and right, front and back) through conscious movement.

#### Student's Individual Performance:

 The student enjoys physical activity, actively participates in games, and generally follows game instructions well, often communicating their thoughts and ideas with the teacher in a timely manner.

课上他们可以织一件与自己身体的某个部位形状一样的物品,然后将其穿在身上。在这个年龄,他们的双脚牢牢地站立在大地上,因此从脚开始是个不错的选择。在低年级他们已经体验过用两根棒针编织织片,很多学生也很享受编织,五年级他们将在之前所学基础上,学习用4-5根棒针进行的圈织,最终的作品是一双适合自己穿着的室内袜。袜子的编织过程涉及到复杂的三维造型,尤其是脚后跟的部位,既需要学生们在"舰队远航"的图景中理解袜根的造型方法,又需要他们充分调动数学计算能力。鼓励孩子们创造性地搭配袜子的颜色,选择自己真正喜欢、愿意穿在身上的颜色。两只袜子同时开始编织,齐头并进,以便保证配色、大小、形状的对称性,这个过程也需要孩子们充分调动意志力和耐心,在两只袜子间频繁的轮流工作。这个阶段儿童的"我"与世界的分化进一步发展。个体的"意志"开始萌发。"自我"意识日益增强。

这个阶段儿童的"我"与世界的分化进一步发展,个体的"意志"开始萌发,"自我"意识日益增强,但个体自我尚在萌芽状态,班级中的强大的集体感出现。编织课提供了一个场域,孩子们在一起体验和感受编织的乐趣和挑战。每个孩子经由自己的工作获得信心和成就感,也经由小组的合作相互学习和交流。

五中汲接子门的身体友育进入一个新的阶段。他们显得更灵活轻盈、胶体更舒展、优推、平衡、任手工

五年级上学期的手工课的学习内容分为两个部分,一是十字绣笔袋的缝制,二是用棒针编织袜子。延续四年级的十字绣工作,完成绣片的绣制、剪裁里衬布料并缝制,加装拉链。这个过程需要复习和巩固十字绣的走线方法和图案设计,学习疏缝、藏针缝和拉链的缝制方法。棒针编织这个过程中学生们复习了棒针的起针、上下针、加减针、收针的方法,学习了用4-5根棒针圈织的方法,尤其是螺纹针、上下针的辨别和、挑织、记号扣的运用、脚后跟的造型等是学习的重点和难点。每一步都需要运用思考和意志力,学生们先通过编织平纹织片复习了起针、上下针和收针,紧接着通过护腕的编织学习了圈织和螺纹针的方法,最后开始袜子的设计和编织,我们采用了从脚后跟开始编织的方法,借助"舰队远航"的图景不断增强学生们的学习兴趣和信心。

就具体的教学目标而言,本学期的手工课致力达成以下教学目标:

- 1、在知识与能力上,巩固十字绣的交叉走线方式,感受色彩的配搭和图案的对称性;棒针编织巩固上下针,知道如何分辨上下针,掌握棒针松紧针的织法,做到针脚均匀松紧适度,掌握圈织的起针、分针、加减针方法,灵活运用4-5根棒针进行编织。可拓展个性化图案编织,理解并掌握其原理,进行图案设计和编织。
  - 2、在学习习惯养成方面,增强对于工具和材料的合理使用、对作品的保管和收纳意识。
  - 3、在情感目标上, 达成对自己双手的确信和对完成工作的成就感。
- 4、在社交上既能够独立工作,有能够与他人合作,在小组合作中既能够清晰的表达自己的想法、感受和意图,又能够聆听老师和同学们的建议。

个体表 现 闻德渊同学对手工课有兴趣,他能够理解和掌握课程的内容,工作比较专注,情绪稳定,在小组合作中能够聆听他人并有效沟通。对于作品的配色有想法,并愿意为作品的品质付出努力,有求完美的倾向,理想和现实有差距的时候动力略显不足。希望未来的学习中,他能够对作品的收纳和保管更加有意识,能够更加大胆和果断的尝试,不惧怕犯错误。

课程描述

通过四年级分数的学习,孩子们开始与破碎的数一起工作了,能否迅速地处理分数问题并不重要,更重要的是他们能够从外部环境中体验到分数,通过自己的经验以及与社会的联系去学习。教学需要从整体推进到部分,从部分推进到整体,还涉及等值分数、扩分和约分等。在此之后,学习分数的四则运算。

"我们必须努力找到从普通分数到小数的过渡,因此才不会显得不合理,或者离我们学生的日常生活太遥远。从开始就让同学们感觉到小数是基于实用性和便利性的一种惯用法。他们也应该感觉到从整数到第一位小数的过渡,只不过是基于构成十、百等数列计数法相同原则的一种继续-.....从一开始,孩子们应该意识到我们数字系统固有的惯性。那么很多其他的惯性就会简单地变成生活的一部分。如果能使孩子们意识到,基本上各种不同的人都依赖于一般协定,那么很多对于权威的错误信仰就会减少。"

——鲁道夫·施泰纳:《教育的改革》 (巴塞尔1920)

根据斯坦纳提议, 五年级数学教学的目标如下:

- (1)继续学习分数及小数,掌握数字的窍门,学生能够用整数和分数小数自由地转换。
- (2) 开启几何的启蒙,为了使学生对于形状获得尽可能强烈的图景,建议他们一开始不要用圆规和 直尺,而是徒手绘制。让学生感受到一些在实用和功利主义之上的维度是很重要的。如果在工作规则及方 法之外,学生们能够感受到形式之美与几何的联系就更好了。允许同学们犯错,重新再次绘制几何图形, 强烈建议同学们彼此之间的相互帮助。

具体而言先复习了四年级的分数学习,进而学习了分数的种类和互化等,在此基础上学习了分数的四则运算,最后跨进小数的世界。五年级正是他们开始巩固初等数学基础的时候,新的小数主题的学习也为六年级百分数的学习搭建好一个舞台。当然,孩子们需要反复练习来提高他们的数学水平。徒手几何课程帮助孩子们以多种方式体验和创造"形",这个过程在帮助他们发展精细动作、平衡觉、运动觉、空间感的同时,也在支持他们从内在发展出对"形"的感受。到了五年级开始进入初步的几何领域,孩子们依然通过徒手画对不同的几何元素之间的关系观察体验,主要涉及圆、角和多边形,每个形都有大量的变化。但是画得要更有意识,也需要额外的专注,因为图形的结构很有序,孩子们需要意志力的参与,图形最重要的鲜明的特质要被呈现出来。在不借助画图工具的前提下,孩子们徒手也力求画得准确,形的某些部分可以运用色彩或是明暗的变化来强调,优美和准确很重要。孩子们不光要欣赏几何的规则,同时也能欣赏其形状的美丽,以及它们那种绝对的规则性与美的相互依存,从而也为以后过渡到尺规几何、证明几何、立体几何打下基础。主要内容设计观察生活中的几个图形,用谷物或生活用品构建圆形、直线等几何图形,从圆和直线开启手绘图形,发现主要的几何图形:圆、三角形、五边形、六边形、正方形、菱形、平行四边形、梯形等,探索3、4、5、6、12等分圆并做图,探索生长变化的图形,学习角度、不同种类的

课程描述	英语教学在四年级学生们对耳熟能详的歌曲、韵文的书写、熟悉基础之上,进入到印刷读本的学习。三个版块,学习了三个故事。《 pancake 》《 Goldilocks 》和《 the gingerbread boy 》,读本学习的过程中代入了英语主格代词的学习, I am, you are, he/she/it is。为进一步推进自然拼读的学习, 带孩子们熟悉了AGO卡牌的玩法,并且用一部分课堂时间让孩子们在教室练习。除此之外, 也尝试带入自主阅读, 用了 Elephant & Piggie这套字体大、 配图简洁、清爽、 故事温馨幽默的系列读本,很多孩子对这套书感兴趣。  整体的课堂节奏尽量做到动静结合、内容在15-20分钟转换,以此来带动孩子们在连堂课上保持专注和跟随。 学期后期也采用了孩子们分组工作、 互相带动学习的方式。 总体上来讲班上的女同学跟随度相对男同学更好一些, 对学习内容的吸收也更好。 第一版块的pancake故事孩子们整体跟随比较理想。 进入第二版块, Jazz chant 版的Goldilocks 的尝试言乐部分配合做不到, 孩子们对故事内容的提前了解及同学们对一些简单重复的厌烦让课堂效果大打折扣。 第三版块转入 the gingerbread boy的学习,情况有好转, 但是由于临近期末, 活动多, 孩子们相对更躁动, 教学效果也受到限制。 歌曲带了两首, 匈牙利民歌 headstrong horses 和 苏格兰民歌 oh ro the rattling bog. 在韵律活动中,选用 ready Oh, let's go, starting with xx,通过内容的变化带领孩子们复习了比较多的食物类单词和日常物品的说法, 也看到敢于开口的孩子越来越多了。 通过抢椅子游戏, 孩子们熟悉了 If you like xxx, you move。 If you are xxx, you move 这样的句式表达。在语言学习过程中, 没有受迫感, 开口说也不感到特别的紧张和压力, 这是我希望的孩子她来越多了。 遗址抢椅子游戏, 孩子们熟悉了 If you like xxx, you move。 If you are xxx, you move 这样的句式表达。在语言学习过程中, 没有受迫感, 开口说也不感到特别的紧张和压力, 这是我希望的孩子们的状态。 总体上看孩子们仍然葆有这样的状态, 这是特别让我感到欣慰的。 教学内容偏多, 对能力弱的孩子来讲有比较大的压力, 这个是需要后续调整的。 教学的有效性需要老师特别关注到不同的孩子, 这是教学的一大难点, 也是老师在准备教学内容及在课上需要重点关注的。

## (Summary)

• Semester 23T2, Year 2023 second term

Student Name: Wen DeyuanStudent ID: 3110292209

Course Code: W01007

Course Name: Main Course 2 Instructor: Wang Xiaofei Total Class Hours: 99

- Starting from the development of awareness in fifth graders, this stage marks the second phase of children's self-awareness, which first emerged in third grade. Children now view themselves and the world with renewed understanding, forming new relationships. Bathing in the brilliance of global civilizations, under the influence of cultures with similar developmental consciousness, they begin to understand their connection with the world. They need stability, which follows the challenges and confidence of fourth grade. Regardless of the circumstances, we can always learn from the world; everything can be our teacher. The content of this course points to the origins of human spiritual light, as ancient civilizations illuminate the path for today's people, helping them find their inner purpose. Children, at this stage, will be more determined to move toward the future. This is the core goal of this course, representing the spirit of true education.
- **Individual Evaluation:** This boy is gentle and calm. He completes the tasks assigned by the teacher. However, when faced with difficulties, he may lose motivation and give up. He needs encouragement and support to build confidence and rekindle enthusiasm.

Course Code: Y01031 Course Name: Art

Instructor: Ren Zhuopeng Total Class Hours: 15

- Fifth graders are particularly interested in their surroundings, including natural technology and the geographical environment. They feel a need to progress further in technical aspects. At this age, both mentally and physically, fifth graders are in a stage of harmonious development. A culture that balances beauty and goodness fits their needs perfectly. They can now work more independently, making their drawings clearer and more precise.
- **Individual Evaluation:** His artwork is harmonious, and the colors are rich. He could be even more daring and add more detail to his work.

Course Code: T00976 Course Name: Music Instructor: Jin Jing Total Class Hours: 26

- Fifth grade is considered the golden age of childhood development, with balance and grace. In music, harmonious choirs are introduced to reflect this balance. The music learning aligns with geography studies by incorporating songs about the Yangtze and Yellow Rivers.
- **Individual Evaluation:** At first, you were a bit quiet, but now you're much more lively, and I can hear your beautiful voice.

Course Code: W00970

**Course Name: Main Course 1** 

Instructor: Ma Lei Total Class Hours: 62

- **Course Description:** Through the fourth-grade fraction lessons, students began to work with fractions. The goal is not to solve every problem but to understand fractions through real-world experiences. The course also introduces operations with fractions, decimals, and eventually geometry.
- **Individual Evaluation:** Wen Deyuan is a disciplined and curious student. He has made significant progress this term, becoming more proactive and willing to ask questions.

Course Code: T00973 Course Name: Drumming Instructor: Tian Bo Total Class Hours: 17

- **Course Description:** Drumming lessons combine elements of Chinese traditional music and various cultural perspectives to enhance students' musical development and cultural confidence.
- **Individual Evaluation:** Wen Deyuan follows the lessons but needs instructions repeated frequently. His drumming rhythm is soft, and he needs to improve his breathing techniques while playing the flute.

Course Code: L00971 Course Name: English Instructor: Feng Jinhui Total Class Hours: 34

- This term, students continued learning through stories like *Pancake*, *Goldilocks*, and *The Gingerbread Boy*. The teaching focused on introducing English grammar, natural phonics, and using playful methods like AGO cards.
- **Individual Evaluation:** Wen Deyuan was more distracted this term compared to the last and often engaged in group activities. His absorption of the learning content needs improvement.

Course Code: L00922 Course Name: Japanese Instructor: Zhao Yuehan Total Class Hours: 37

- **Course Description:** Students performed a Japanese play titled *Momotaro* and learned about adjectives and precise time expressions. The play deepened their connection with the Japanese language.
- **Individual Evaluation:** Wen Deyuan demonstrated increasing focus and engagement during Japanese lessons, particularly after the play performance.

Course Code: 500977

**Course Name:** Mathematics I

**Instructor**: Liu Ruili **Total Class Hours**: 48

## **Course Description:**

At this stage of child development, students are experiencing a period of rapid growth. As their physical stature increases, they also develop a sense of coordination, balance, and grace, which brings comfort and elegance to their movements. Psychologically, the differentiation of the "self" begins, with a growing awareness of their own willpower. While personal self-awareness is still in its early stages, there is a powerful group dynamic within this age group. Children at this stage begin to approach problems and phenomena with reasoning and a more realistic perspective. Visual elements in their thought processes remain important, alongside an increasing memory capacity, which helps them reflect on the past and plan for the future. Their deepening emotions also foster a sense of conscience and responsibility.

#### **Class Observations:**

In daily classroom observations, students appear eager to improve their learning, take pride in their progress, and seek constructive feedback. They are becoming more mature and capable of understanding complex mathematical concepts, gaining confidence in the math they learned in previous years. As students grow, their individual strengths and talents become more pronounced, showcasing their unique abilities.

#### **Teaching Content:**

- Review of vertical calculations for the four basic operations (addition, subtraction, multiplication, and division)
- Review of fractional operations: addition, subtraction, multiplication, and division
- Simplifying and finding common denominators
- Learning to find the least common multiple
- Advanced practice in fractional operations
- Mental math (daily exercises, including halving and simplified calculations)
- Simple word problems and puzzles
- · Application problems related to daily life

#### **Individual Performance:**

At the beginning of the semester, you were more reserved, passively absorbing knowledge. However, you gradually became more focused, actively participating and expressing your thoughts. This transformation has allowed the teacher to see a different side of you. As long as you overcome laziness and a lack of confidence, you are bound to improve and excel further!

Course Code: Y00974 Course Name: Handicrafts

Instructor: Ma Jun Total Class Hours: 28

- In class, they can weave objects shaped to fit parts of their body, such as socks. Fifth graders will build on their previous experience and learn circular knitting with 4-5 needles, creating a pair of indoor socks. This project involves complex 3D shaping, especially around the heel, requiring both math skills and creativity.
- Individual Evaluation: Wen Deyuan is interested in handicrafts, understands the content, and works diligently. He is calm and communicates well in group tasks. He has creative ideas for color matching and works hard to achieve perfection.

Course Code: KO1119

**Course Name**: Chinese Geography

**Instructor**: Wang Liwei **Total Class Hours**: 36

## **Course Description:**

Fifth-grade students are in the middle of childhood, a period where their perspective broadens, allowing them to see further beyond their immediate surroundings. Geography study at this stage expands to cover all of China. Unlike history, which follows a timeline, geography focuses on space, starting from the local environment and gradually expanding outward to more distant places, eventually covering the entire world. Geography is, in essence, a natural history, while history is a record of civilization.

Geography is a comprehensive subject that integrates various elements of the natural environment, including minerals, plants, and animals, along with the way people live in different regions. Over time, historical aspects are also incorporated into the study.

In preparing for this course, one book emphasized two primary goals of geography education: awakening a sense of responsibility for the Earth and fostering respect, care, and compassion for others. This learning experience plays a significant role in helping students develop a well-rounded worldview.

The study of Chinese geography begins with an exploration of China's physical environment—rivers, mountains, forests—elements that serve as symbols shaping the image of the country. Students are then encouraged to understand the people living in various regions, helping them realize the deep connection between the environment and the people it nurtures.

#### **Individual Performance:**

A gentle and serious student, this child sets clear expectations for himself and approaches learning with great dedication. At the start of the semester, they had some difficulty following the lessons and often needed teacher reminders. The student can easily be distracted by peers or surrounding events. In the Chinese geography section, the student showed increased interest and engagement, actively participating in class discussions. However, they still required occasional reminders to stay focused, and their main textbook work was not completed to the same extent as that of other classmates.

Course Code W01239

**Course Title**: Chinese Language

**Teacher**: Wu Ting **Total Hours**: 47

**Course Description**: The curriculum includes the study of poetry, classical and modern texts, and essay writing. Evaluation is based on language skills, class participation, and homework.

Unfortunately, one student has struggled to complete homework and participates minimally in class discussions. This lack of engagement may hinder the development of their willpower. I encourage the family to provide more support and guidance at home to help the student overcome these challenges.

**Course Code T01238** 

Course Title: Physical Education

**Teacher**: Qi Chenglong

**Total Hours**: 64

**Course Description**: Students are encouraged to actively participate in all activities, building a clear understanding of movement, and applying this knowledge in games and exercises.

The student shows enthusiasm and creativity, participating fully in group activities and exercises. However, they are sometimes quiet when speaking English and need to build more confidence.

Course Code: U00918 Course Name: Dance Instructor: Zhao Zixuan Total Class Hours: 11

## **Course Description:**

This semester's content mainly includes the following:

- More complex linear patterns (such as the five-pointed star)
- Continued study of Apollo's grammar
- Practicing linear movements facing forward
- Exploring the characteristics of different cultures through music, posture, and movement
- Continued attention to balance and agility exercises
- Continued practice of major scales

#### Individual Performance:

In the second half of the semester, the student appeared more relaxed in class, with more fluid body movements. During one instance of leading the group into the space, the student demonstrated a good sense of spatial awareness. However, in most group exercises, the student is still not very vocal in expressing opinions.

5. 掌握手缝基本功:起针、跑马针、回针、锁针、斜线绣、链式绣、钉针绣; 学习编绳; 能积极、认真地完成服装及配件的测量、裁剪及缝合。

6.提高孩子们审美力。

#### 二、教学内容:

古奥服的制作:

今年每个孩子为自己制作战袍、花环、腰带、披风和名牌。整个体验过程包含测量、画图、裁剪布料、徒手窝边(最后体验熨斗窝边)、基础针法的学习(根据孩子的不同能力或需求采用跑马、回针、斜线绣、链式绣、勾缝和藏针等针法)和编绳等丰富的实践内容。其中最挑战的工作在于披风(四边)、主体战袍(八边)、花边(四边)的缝合。

古奥服的工作非常繁琐,细节太多,课时又很有限,很多学校的老师会选择删减孩子的工作量,但我还是希望他们能完整地体验全程,因此教学还是从测量、绘图和裁剪布料开始,让他们一步步独立完成每个阶段的工作。前期孩子们进展比较缓慢,通过练习他们逐渐熟练,到了学期中期整体的工作效率逐渐提升,后期在主班的支持下,我们额外增加了一些课后的工作时间,大家都能及时赶在古奥会之前完成了所有的服饰。在整个工作的过程能看到每个孩子的意志力得到了不同程度的发展,大家都尽了自己最大的努力,他们也由此收获了自信和满足。古奥会之后孩子们在课堂上分享了他们的观察和感受,很多孩子非常自豪地提到了他们在这次活动中对比了每个学校的古奥服饰,他们认为自己的服装工序最多,制作的实用性和品质都非常好,没有一件衣服需要在活动中返工或加固,这些感受将成为他们未来工作的新动力。

古奥会之后已经接近期末,孩子们没有时间继续上学期的袜子收尾工作,这项工作将持续至下个学期,预计开学后第一个月完成。

个体表现

热爱手工,享受工作。有一定的手工能力,工作比较细致,对工作品质有自己的内在要求,但是工作 节奏偏慢,有时需要老师及时提醒和关注,意志力有待加强。希望未来能更加积极主动,"现阶段完成比 完美更重要。"

课程描述

教学目标: 知识与能力、学习习惯养成、课堂管理、核心价值观(教育的精神意涵)。

- 1 通过图景、节奏、韵律和角色艺术化的教学方式和鲜活的学习内容,激发孩子对英语学习的兴趣,提高他们学习的主动性,提升内驱力。
- 2 引导他们逐步适应从低年级到中年级的教学节奏和教学方式。逐步从游戏和听说逐渐进入文本的学习和阅读,以及逐步适应听、说、写和读融为一体的整体学习。
- 3 鼓励他们通过多元感官的参与去习得语言,培养良好的语言学习习惯,帮助每个个体找到适合自己的学习方式和节奏。

4学习呼应节气和孩子当下意识状态的诗歌、韵文、晨圈律动,开启阅读文本的常规教学,鼓励他们用 艺术化的方式去分享和呈现习得的内容,逐渐能学以致用。

5 中西方文化互动 (复活节、端午节等)

本学期刚接手五年级的英语教学工作,今年的课程时间也极为特殊,因为英语板块恰好遇上了五年级的两次游学,原计划45节课时,实际教学课时只有28节。由于教学时间比较紧张,我一再将教学的内容和安排做了多次的精简和有机整合,这个学期主要进行以下教学实践:

- 1 学习诗歌、韵文和晨圈律动;
- 2 以听、读、演的方式学习核心读本 PETER PAN;
- 3 利用晨读复习诗歌韵文,同时引入两个课外读本(泛读)THE UGLY DUCKLING 和THEENORMOUS TURNIP;
- 4、日常英语会话: (A) 自我介绍. (B) 天气. (C) 日期. (D) 星期. (E) 数字 (基数词 1~100/序数词 1~12). (F) 兴趣/爱好.
  - 5、英语书法: 花体字的引入, 我们一起在课堂上体验了字母 A~E 的花体字的书写过程。
  - 6. 主课本的工作: 数字和水果(少量);
  - 7、教学输出:小组项目---英语小戏剧/英语角色扮演。

小戏剧主要是让孩子们输出学过的文本及诗歌等内容,引导孩子们分组合作,自导自演。老师根据孩子们的语言能力和兴趣,分四组进行角色扮演或小戏剧练习,期末有三组完成小组项目并向二年级、四年级四个班展演。其中皮影戏小组的孩子们将在假期继续打磨,预计在开学第一个月完成。这个学期英语课堂的核心读本以听、读、说、背、演(未来还有写)的方式进行,重点在于营造场景和氛围,让孩子感受语言的实践运用。这种"演"不是真正的戏剧,我更倾向于称之为角色扮演或即兴小戏剧,因为我们语言课时间非常有限,我们要尽可能在最短的时间能让他们有更多浸润式的语言环境,创设更多有利于个体去运用

一差に

Auto de la lace de

今年考虑到内容安排的性价比,语言教学的重点立足于听说和读,尤其是培养孩子的阅读习惯,找到适合个体的学习方式和节奏,让他们能够更好地通过自然的方式去习得语言。每个孩子都是独一无二的,我一直坚信每个个体孩子有自己的兴趣、节奏和学习方式,成人能做的是尽可能去帮助他们找到真正契合他们的学习方式,最重要的是帮助他们养成良好的学习习惯、建立健康可持续的学习节奏,培养强有力的意志力。

从他们的晨读、课堂参与情况来看,他们对语言学习有兴趣,也初步有了一定的节奏和习惯,他们逐渐从低年级的玩耍、听、说进入中高年级以阅读为核心,融合听、说、写、读为一体,以自主学习和探究为主的学习方式,他们在多元的教学活动中能和老师、同学进行积极、和谐地互动,整体的学习状态良好。

#### 个体表现

对英语学习有兴趣,学习态度端正。说英语时音量较小,但是整体比较享受。在晨圈律动环节,比较跟随投入。在期末的小戏剧中,他与组员有默契的配合,有担当。希望未来更加自信,享受过程。

五年级,孩子们处于二次身高发育前的协调、平衡与和谐阶段。个人"意志"与"自我意识"都开始萌发。力量与精细控制也在同步增长。

五年级下半学期的木工课程,配合"古奥会"的主题,先是开展了意志的锤炼。给孩子们用约10次课的时间,尝试用比上学期的椴木坚硬的多的榉木,进行手锤的制作,因为是在以后的课程中,会持续使用的工具类作品,所以没有对精细化进行过多的要求,以功能实现(手掌可以有效抓握)为主,也给了孩子们自我发挥的空间,全班28位同学,展现了28种样貌,像一面镜子,让老师从一个侧面窥见了孩子们当前各自的状态。

在本学期后五分之二的课程中,带领孩子们使用自己制作的手锤,开始了木碗的挖凿工作。这次进行了全新的尝试,即根据每个孩子自己设计确定的尺寸形状以及课程中意志力表现的不同,给出了另外4种不同硬度的木料(杏木、樱桃木、南美黑胡桃木、梧桐木),给到了孩子们更多的探索空间,也减弱了横向比较的可能。也为六年级完成更精细作品,争取了一些工作时间。

THOUSE STATE

课程描述	五年级字生已经来到童中的中心时期。孩子们的眼尤可以看到更远的地方了,他们生活的自然环境中,可以从本地扩展到更大的范围中去,五年级的地理学习需要纵观整个中国了。地理有和历史不同的姿态,历史和时间有关,按时间的脉络去延展。地理是和空间有关的,从当下身边开始,从这里一点点扩展到更遥远的地方,直至整个世界。地理其实是一部自然史,而历史是一部文明史。地理其实是个综合性的课程,它会把地域中的矿物、植物、动物等结合进来,这个空间环境中的人们是如何生活的,慢慢地会把历史也融入进来。自己备课时看到一本书,书上曾强调地理教授的目的有两个:一是唤醒孩子对地球的责任心;二是唤起孩子对所有人类的手足之情。孩子学习地理,升起对自然环境的热爱和感恩,也会对不同地域生活的人保有尊重、关注和爱心,这对于孩子建立正确的世界观会产生具大的影响。中国地理的学习,首先想先让孩子们从物理环境的角度去看待整个中国:河流、山川、森林等,这些元素更像是各种符号在书写中国的样貌,之后希望孩子们了解生活在中国各个地方的人们。也就是让孩子们真切的感受到:一方水土养育一方人。					
个体表现	一个温和、公正、做事认真的孩子,对自己有明确的要求,所以很认真对待学习。平时爱和周围小伙伴相互"挑逗",所以容易有小摩擦,遇到自己认为不公正的摩擦时,偶有大的情绪出现。这学期课堂跟随度有所提高,不过是需要老师的关注和提醒,也会受到他人的影响,忘记自己的工作,他在进入到专注的工作前,是需要很长时间的。这学期中国地理版块,闻德渊课上跟随度比较高,对地理比较感兴趣,积极互动,但课上是需要老师提醒的,与大多数同学相比,主课本完成度不是很高。

#### Main Course 3: Plants and Botany (Course Code: W01393)

#### Japanese

Course Number: IL01240 Instructor: Zhao Yuehan Total Class Hours: 46

#### First Section (February 26 - March 16, total of 15 lessons)

#### **Teaching Plan:**

- Welcoming the arrival of spring, linking it to the "People and Plants" theme that the children are learning this semester.
- Reviewing the content from last semester.

#### **Teaching Content:**

The main content of this section is divided into three parts:

- 1. **Reviewing adjectives and time expressions from last semester**, and continuing to sing the song "Great Luck in the Ancient Dark Words."
- 2. **Learning the text "Flower Residence"**: 22 vocabulary words, all organized in the main textbook, followed by writing practice. The text consists of 4 paragraphs, which are written and illustrated in the main textbook.
- 3. Writing practice for previously learned body parts: A total of 20 body parts were written down. Aside from the five senses, the focus was on larger body parts. These were organized in the main textbook, followed by writing practice.

#### **Teaching Activities:**

- 1. **Silent Sandbag Toss**: This activity aligns with the children's geometry lessons, promoting focus and teamwork.
- 2. **Related to the text**: The activity was to plant a "Flower Path" in the school, guiding the children to plant flowers along the stone paths on the south square of the school.

## Second Section (April 8 - May 5, total of 17 lessons)

#### **Teaching Plan:**

- Aligning with students' awareness of ancient civilizations, learning about Japanese mythology. This content was introduced in the third grade when students first learned Hiragana, using it as a foundation for creation myths. This semester, the study is expanded in depth.
- During vocabulary study, **many verbs were introduced**, laying the foundation for upcoming verb grammar lessons.

#### **Teaching Content:**

- Learning the script of "The Hare of Inaba," consisting of 4 acts of dialogue and 40 vocabulary words.
- Continuing with sandbag toss practice, adding challenges like diagonal throws and defensive plays.
- After each act, students illustrate the scenes through drawings.

#### Third Section (May 28 - June 14, total of 13 lessons)

#### **Teaching Plan:**

 Presenting the script, preparing for performances by reading and memorizing lines.

#### **Teaching Content:**

• Dividing into groups to present the script in various forms, including puppetry, shadow play, picture shows, and illustrations. The students prepared their props and rehearsed independently.

#### **Teaching Activity:**

Performances for younger students and parents.

## **Student Progress Report:**

Deyuan has become more outgoing this semester and is more willing to interact with different children, showing a shift in his social relationships. His individual academic performance remains strong, but he generally seems emotionally reserved. During rehearsals, he appeared to be under significant pressure, especially with memorizing lines, which he found challenging. His nervousness made the task even harder. We hope he can maintain a light-hearted and relaxed mindset moving forward.

#### **Course Description:**

**Mathematical Objectives:** Knowledge and ability, development of learning habits, classroom management, and core values (educational spirit).

- 1. By using artistic teaching methods such as images, rhythm, role-playing, and vivid learning content, this course aims to spark children's interest in learning English, increase their initiative, and enhance their internal motivation.
- 2. It guides them to gradually adapt to the teaching pace and style transition from lower grades to middle grades, moving from play and oral expression to text-based learning and reading, and integrating listening, speaking, writing, and reading into a cohesive learning experience.
- 3. The course encourages children to acquire language through multi-sensory participation, fostering good language learning habits and helping each child find a suitable learning method and rhythm.
- 4. Students will learn poems, rhymes, and morning circle rhythms that resonate with the seasons and their current awareness, while beginning to engage in regular text reading. They are encouraged to present learned content in artistic ways, gradually applying what they have learned.
- 5. The course also incorporates cultural activities from both Western and Chinese traditions (e.g., Easter, Dragon Boat Festival).

This semester marked my first time teaching fifth-grade English, and it was unique due to two study tours that overlapped with the English section. Originally, 45 lessons were planned, but only 28 actual lessons took place. Due to the tight schedule, I streamlined and integrated the course content, focusing on the following teaching practices:

- 1. Learning poetry, rhymes, and rhythmic movements.
- 2. Studying the core text *Peter Pan* through listening, reading, and performing.
- 3. Reviewing poems and rhymes during morning reading sessions, while introducing two extracurricular reading books (*The Ugly Duckling* and *The Enormous Turnip*).
- 4. Daily English conversation practice: (A) Self-introduction (B) Weather (C) Dates (D) Days of the week (E) Numbers (Cardinal: 1-100 / Ordinal: 1-12) (F) Interests and hobbies.
- 5. Introduction to cursive English calligraphy: We practiced writing letters A-E in class.
- 6. Main textbook activities: Focus on numbers and a few fruits.
- 7. Teaching output project: small English plays/role-playing exercises.

The small plays are designed to help children demonstrate their understanding of texts and poems through group work and self-directed performances. The teacher organizes the

students into four groups based on their language abilities and interests for role-playing and practice. By the end of the semester, three groups had completed their projects and performed for second and fourth graders. One group will continue to refine their project during the holiday, aiming to complete it in the first month of the new semester. The core textbook was taught through listening, speaking, memorizing, and performing (with some writing). The focus was on creating an immersive environment where students could experience language in practical use. This "performance" is not true theater but more like role-playing or improvisation, as we have limited language teaching time and need to maximize immersive language exposure.

Considering this semester's time constraints, the course emphasized listening and speaking, especially cultivating students' reading habits and helping them find their own learning pace. Each child is unique, and I firmly believe each child has their own interests, rhythm, and learning style. As educators, our role is to help them discover their best learning method, nurture good habits, establish a sustainable learning rhythm, and cultivate strong willpower.

Based on classroom performance and participation, the students showed high interest in language learning and started to develop consistent habits. He have gradually transitioned from the play-oriented learning of lower grades to reading-based learning in middle grades, integrating listening, speaking, writing, and reading, with an emphasis on independent learning and inquiry. He actively engage in diverse teaching activities, collaborating harmoniously with both the teacher and classmates. Overall, their learning status is good.

Course Code: W01239 | Course Name: Chinese | Instructor: Wu Ting | Total Hours: 49

#### **Course Description:**

The course includes selected readings of poems, classical texts, and modern literature, as well as writing assignments.

Assessment is based on Chinese language skills, class participation, and homework.

Throughout the semester, very few Chinese assignments were received, and the student's overall progress was slower than others. It is difficult to assess their mastery of the learning content, and it is unclear what they have absorbed or where they are struggling.

The student rarely participates in class discussions or communicates with the teacher. This persistent lack of completed assignments is detrimental to their willpower development. The teacher's support is limited, and additional help from home is necessary to overcome current challenges.
